ТЕХНОЛОГИЯ BRAKE SMART

RU Тормозные колодки WEEN – это высокий уровень производства, повышенное внимание к деталям и соответствие современным стандартам безопасности в области тормозных систем, комплексный подход к проектированию, производству и контролю качества продукции.

Оптимальный состав многокомпонентной смеси фрикционного материала гарантирует сокращение тормозного пути без уменьшения уровня комфорта при движении, увеличивает рабочие и ресурсные характеристики тормозных колодок WEEN.

Благодаря сбалансированной формуле фрикционного материала тормозные колодки WEEN оказывают минимальное агрессивное воздействие на тормозные диски и барабаны.

В результате строжайшего соблюдения технических условий производства, прочность соединения фрикционной накладки с основанием колодки в 4 раза превышает требования.

Технология Brake Smart - это использование специально разработанного теплоотводящего слоя между фрикционной накладкой и основанием колодки. Целью применения данного слоя является эффективное отведение избыточного тепла, выделяющегося из рабочей зоны контакта тормозной колодки с тормозным диском во время торможения.

Технология Brake Smart разработана для критических нагрузок, на этапе моделирования которых были заложены параметры, значительно превосходящие стандартные условия эксплуатации. Эффективность снижения температуры в зоне трения, благодаря технологии Brake Smart, достигает 27%, стабилизируя коэффициент трения при повышенных температурных нагрузках.

Тормозные колодки WEEN, произведенные по технологии Brake Smart – инновационность технических решений и бескомпромиссность в вопросах качества.

EN Brake pads WEEN represent a high level of production, increased focus to details and compliance with safety existing standards in the field of brake systems, integrated approach to designing, production and products quality control.

Optimal formula of multicomponent friction material mixture secures reduction in braking distance without decreasing of comfort during driving, increases working and resource characteristics of WEEN brake pads.

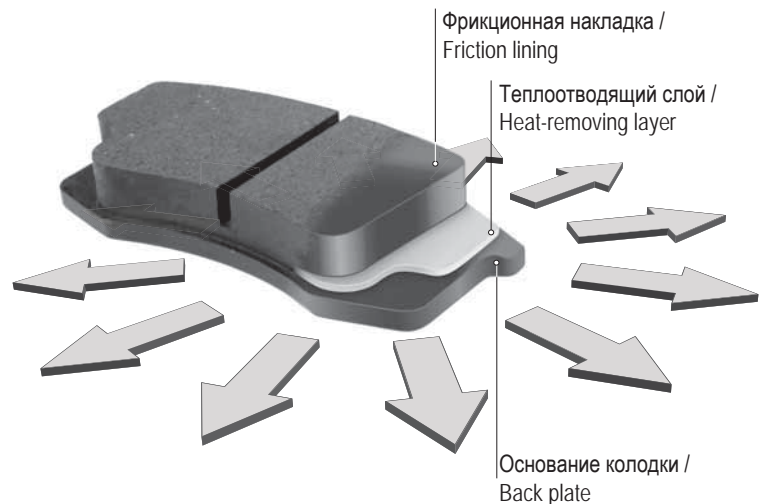

With balanced formula of friction material WEEN brake pads have minimal aggressive impact on brake discs and drums.

Due to strict technical conditions observance during production, strength of friction lining and back plate connection exceeds requirements by 4 times.

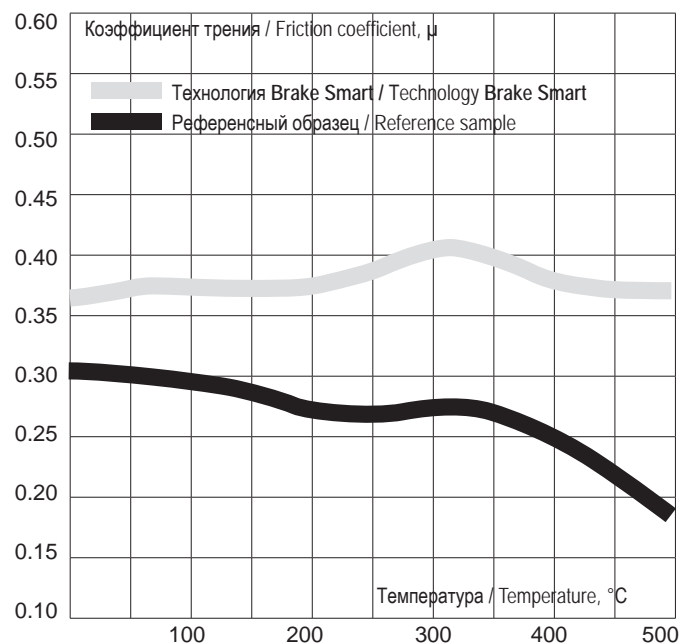

Brake Smart technology - is usage of specially designed heat-removing layer between friction lining and back plate. Purpose of this layer application is efficient removing of excess heat generated from working area of brake pad and disc contact during braking process.

Brake Smart technology developed for critical operating conditions during modeling of which were laid parameters surpassing standard conditions. Thanks to Brake Smart technology effectiveness of temperature reducing in friction area runs up to 27%, stabilizing friction coefficient at high temperature conditions.

Manufactured with Brake Smart technology brake pads WEEN - innovative solutions and uncompromising stand to quality.

Стабильная эффективность торможения в широком диапазоне температур / Stable braking efficiency in wide temperature range
